SUMMARY

Results-driven Multicloud Engineer with experience delivering scalable AWS and Azure cloud solutions for global enterprise environments. Adept at driving operational efficiency by implementing Infrastructure as Code (Terraform) and automating build-test-deploy lifecycles via GitHub Actions and Jenkins. Strong foundation in containerization (Docker, Kubernetes) and cloud networking, focused on accelerating software delivery and ensuring secure, cost-optimized cloud operations.

WORK EXPERIENCE

Cognizant Technology Solutions | *Multicloud Engineer – CIS Division* | 04/2025 – Present

- Managed and sustained enterprise multicloud infrastructure (Azure, AWS) across EC2, VMs, VPC, S3, IAM, and RDS to ensure peak system availability, scalability, and reliability.
- Engineered reusable Infrastructure as Code (IaC) templates using Terraform, reducing cloud resource provisioning time by 40% across AWS and Azure.
- Orchestrated containerized applications using Docker and Kubernetes (EKS), enhancing application portability and scaling capabilities across distributed cloud environments.
- Architected automated CI/CD pipelines via GitHub Actions and Jenkins, cutting deployment error rates and accelerating software release cycles.
- Authored automated scripts in Python, Bash, and PowerShell for routine system health checks and job scheduling, saving the core infrastructure team hours of manual work weekly.
- Configured robust cloud networking and security controls, including VPCs, security groups, IAM policies, and encryption, strictly adhering to least-privilege access models.
- Monitored system performance using CloudWatch, Prometheus, Grafana, SolarWinds, and SCOM; supported ITIL-based Major Incident Management (MIM) via ServiceNow for rapid triage and root-cause analysis.
- Administered Linux/Unix-based systems and managed virtualized environments (VMware vCenter, XenCenter), executing proactive configuration management and troubleshooting to maintain stable infrastructure.

Rashtriya Ispat Nigam Limited (Vizag Steel Plant) | *Database Management Intern* | 05/2022 – 07/2022

- Developed and optimized over 50 SQL queries, stored procedures, and triggers in Oracle and SQL Server, enhancing query performance and reporting speed by 25% through strategic indexing.
- Supported critical database backup, recovery, and disaster recovery operations, rigorously validating restore procedures to guarantee 100% data integrity and high availability.
- Executed database administration tasks within Linux/Unix environments, utilizing SQL and shell scripts to proactively troubleshoot connectivity and server performance anomalies.
- Collaborated with cross-functional teams to resolve complex database and system performance issues, reducing downtime by 30% and improving operational knowledge sharing by 40% through formalized documentation.

PROJECTS

OmniKube | *Tools: Kubernetes, Docker, Helm, Terraform, GitHub Actions, Jenkins, Prometheus, Grafana*

- Developed a cloud-native Kubernetes platform for deploying and managing containerized microservices across AWS/Azure environments.
- Automated infrastructure provisioning using Terraform and implemented complete CI/CD pipelines using GitHub Actions and Jenkins to streamline application builds and continuous delivery.
- Integrated Prometheus and Grafana for real-time cluster monitoring, metrics collection, and alerting, while enforcing strict RBAC security policies and Linux/Bash automation scripts.

Frontica Aker Solutions (Oslo, Norway) | *Tools: Azure Cloud, VMware, Cisco Catalyst/Nexus, PowerShell, SolarWinds, SCOM*

- Supported enterprise-scale Azure cloud and on-premises data center operations, managing virtual machines and complex cloud infrastructure to maintain 99.9% system uptime.
- Automated infrastructure monitoring and operational workflows using PowerShell scripts, significantly reducing manual effort and improving incident response times.
- Monitored global infrastructure health using SolarWinds Orion, SCOM, and ServiceNow, collaborating with cross-functional teams to execute root-cause analysis and proactive maintenance.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Microsoft Azure, Google Cloud Platform (GCP)
- **Containerization & Orchestration:** Docker, Kubernetes (EKS), Helm
- **Infrastructure as Code & CI/CD:** Terraform, Jenkins, GitHub Actions, Git
- **Scripting & Databases:** Python, Bash, PowerShell, SQL, Oracle, PostgreSQL, MySQL
- **OS & Observability:** Linux/Unix, Prometheus, Grafana, CloudWatch, SolarWinds, SCOM

EDUCATION

- **Bachelor of Technology (B.Tech.) in Computer Science** | CGPA: 8.75/10
Koneru Lakshmaiah Education Foundation | Vijayawada, India | 2020 – 2024

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Azure Developer Associate
